

**Preserve Your Pet Food and Treats with
Dadex® Antioxidant Solutions!**

Dadex® Antioxidants Costly Oxidation

It is important to add the proper amount of the correct Dadex® antioxidant as early as possible in supply chain. Each oil type and processing environment can require a different type or combination of antioxidants.

The choice of Dadex® will depend on the fatty acid profile, natural antioxidants present and processing conditions.

Adding Dadex® early on will:

- Help prevent the initiation step of the oxidation process
- Provide proper dispersion

Dadex® Features:

- Liquid and dry versions
- Natural and synthetic options
- Turn-key and fully customized solutions available (depending on your unique application requirements)
- Human grade ingredients with dedicated production facilities
- Global sourcing to offer your preferred country of origin

Dadex® Benefits:

- Improved shelf life of finished products
- Increased palatability
- High quality finished products

Technical and on-trend application support and development:

- Fully equipped laboratory and team of scientists
- Shelf-life extension experts in both food and treats
- We are an extension of your R&D department

Organic, Non-GMO, Non-GMO Project Verified and Gluten-Free Products Available
