

# SafGlucan

Purified yeast 1,3 and 1,6 beta-glucans

## Description

**Safglucan®\*** is a purified yeast fraction rich in beta-glucans (1,3 and 1,6), obtained from primary grown proprietary strain of *Saccharomyces cerevisiae*. **Safglucan®** contributes to reinforce the natural defenses of dogs and cats, and helps training their immune systems to protect them against daily life aggressions.

## Typical profile

Active components

β-1,3/1,6-glucans	≥ 50 %
-------------------	--------

Nutritional

Moisture	≤ 6 %
----------	-------

Crude protein	≤ 10 %
---------------	--------

Microbiological

Salmonella/25g	Negative
----------------	----------

## Physical characteristics

Odor	Typical yeast odor
------	--------------------

Appearance	Powder
------------	--------

## Recommendation

Dogs	250 - 500 ppm diet DM*
------	------------------------

Cats	250 - 500 ppm diet DM*
------	------------------------

*Incorporation rate to be adapted to specific needs.*

*\*DM: Dry Matter*

## Packaging and Storage

Packaging: 20 kg polyethylene bag.

Shelf life: 2 years from production date, in original packaging.

Storage: keep in a dry and cool place for optimum preservation. Close bag after use.

*\*Safglucan® has GRAS status for use in feed in all animal species including cats and dogs.*
