

# CUSTOM AERATION SYSTEMS

SafeGrain specializes in custom aeration systems tailored to complex grain storage setups, ensuring your grain stays dry, fresh, and free from contaminants.

## HOPPER AERATION

SafeGrain's Full Round and Half Round aeration systems optimize airflow in hopper-bottom bins. Full Round provides 360-degree air distribution, while Half Round directs airflow for targeted conditioning. Both options are built for durability and efficient grain preservation.

## FULL ROUND SPECS:

14 GA  
0.075" minimum thickness,  
corrugated  
3/32" diameter holes on 1/4"  
staggered centers

## DUST CONTROL

We specialize in site-specific dust control solutions, designed to meet the unique needs of your facility.

## BIN AND SILO AERATION

We offer Main Aeration for uniform conditioning and Tunnel Aeration for efficient airflow distribution through structured channels. Both options help regulate temperature and moisture, reducing spoilage and preserving grain integrity.

## ACCESSORIES

Silencers  
Rain Shields  
Roof Vents  
Power Roof Vents  
Transitions  
Floor Cover Sheets

# ROOF EXHAUST FANS

We specialize in designing and manufacturing high-performance roof exhaust fans. Our fans are engineered to provide optimal ventilation, ensuring safe and efficient operations in grain storage and handling facilities.

## WHY SAFEGRAIN IS THE SMART CHOICE FOR EXHAUST FANS

*Designed for performance, precision, and durability, SafeGrain exhaust fans stand out with:*

- ✓ *Gravity damper to block out weather and birds*
- ✓ *Customizable notch for a perfect fit on any bin manufacturer's roof ribs*
- ✓ *Proudly made in the USA at our Dayton, OH facility*

*Built for reliability. Engineered for efficiency. That's the SafeGrain advantage.*

### 692 NOTCHED SERIES

**Heavy-duty 16ga one-piece housing with an inspection cover for easy maintenance**

**Roof rib straddle design for higher placement and reduced roof stress**

**Compatible with multiple bin manufacturers for a perfect fit**

**Available in 50Hz and 60Hz models to meet your power requirements**

**Gravity damper keeps out weather and birds**

**Explosion-proof option for enhanced safety in hazardous environments**

### 690 FLAT ROOF SERIES

**Durable 16ga one-piece housing with an inspection cover for easy servicing**

**Optional mounting sleeve available for concrete silo installations**

**Compatible with 1-phase and 3-phase power supplies**

**Available in 50Hz and 60Hz models to meet your power needs**

**Gravity damper blocks out weather and birds**

**Explosion-proof option for enhanced safety in hazardous environments**
