

LEVEL MONITORING

Our radar and mechanical level monitoring products provide real-time grain, liquid, and bulk storage material monitoring without the need for risky climbs.

ROTOTRACK

Mechanical level monitoring

Intelligently shuts down upon reaching full bin or silo capacity

Ensures prolonged device lifespan

Easy installation

RADARMAX PLUS

Measure distances up to 180 feet

80GHz for the highest accuracy

Includes both Modbus RTU and 4-20mA dual outputs

Includes 10° adjustable tilting flange

RADARMAX

Measure distances up to 60 feet

60GHz

Hinged mounting plate for easy installation and inspection

Modbus RTU output is compatible with our radios

RADARMAX ULTRA

Measure distances up to 393 feet

Ideal for highly specialized applications requiring customized level monitoring

RADARMAX AIR

Measure distances up to 98 feet

80GHz for the highest accuracy

Included Bluetooth App

RADARTRACK SOFTWARE

Unlock Precision Inventory Management with RadarTrack Software: Real-time Monitoring, Advanced Metrics, and Seamless Remote Access

UNBEATABLE FEATURES:

- **Real-time graphics showing bin inventory status at the user-specified update rate**
- **Detailed metrics showing each bin or silo's percent full, feet-to-full or empty, and approximate volume (bushels, US ton, Ft3, Metric ton)**
- **Time-to-full and time-to-empty calculations**
- **Automatic and manual report creation**
- **Web server for remote viewing via**
- **Android, iPhone, browser on any web-enabled device**
- **Ability to configure text message and email alerts based on user-defined setpoints**
- **Capable of external relay operation for alarms, equipment interlocking and PLC interfacing**
